

Hello,

I have extensive knowledge of ReactJS, Redux, NodeJS, NextJS and MongoDB. Combined with my communication and problem-solving skills, I think I would be an excellent candidate for the Web Developer role at XYZ Company.

In my current role as a Junior Frontend Web Developer at XYZ Reality, I built user interfaces for websites and/or web applications Working with ReactJS, Redux, TypeScript Creating self-contained, reusable, and testable modules and components, and I wrote some end-to-end test on Cypress, JestJS

I have always been passionate about web development, which led me to pursue a Bachelor of Computer Science degree. I am constantly seeking out new technologies and staying up-to-date on trends in the industry. XYZ Company has created some of the most innovative websites in the world, and I would be so thrilled to join the team as a Web Developer.

Thank you for taking the time to review my qualifications. I look forward to sharing more about my skills and experiences. Feel free to contact me at +41 77 259 0414 or sayinmehmet47@gmail.com
